

BHOOMI SINGH

Software Engineer | Frontend Developer

Delhi, India | bhoomi.singh96957@gmail.com | github.com/bhoomi-singh21 | linkedin.com/in/bhoomi-singh-865859373

PROFILE

Software engineering student with a strong foundation in C++ and Object-Oriented Programming, backed by solid Data Structures & Algorithms skills that I continue to sharpen through consistent practice. Highly proficient in frontend development with HTML, Tailwind CSS, and JavaScript, having independently designed, built, and deployed multiple end-to-end web applications. Currently expanding into backend development to grow into a well-rounded full-stack engineer. Participated in Smart India Hackathon (SIH), contributing to the frontend of an AI-based internship recommendation platform under tight hackathon deadlines. Known for a strong work ethic and a habit of shipping polished, fully documented projects.

EDUCATION

Delhi Technological University (DTU)

B.Tech in Electronics and Communication Engineering | Delhi, India

Aug 2024 – Present

PROJECTS

Student Placement Tracker

HTML, Tailwind CSS, JavaScript

[Live Demo](#) | [GitHub Repo](#)

- Built a web application that helps students organize and monitor their entire placement journey in one place, including companies, application progress, and important dates.
- Tracked the complete placement pipeline by adding companies, roles, application dates, OA dates, interview dates, package, location, and application status.
- Designed an interactive dashboard displaying placement statistics such as Total Companies, Applied, Selected, and Rejected, with real-time updates as data changes.
- Implemented powerful application management with search, status-based filtering, and full CRUD operations (Add, Edit, Delete) to easily organize and manage placement applications.

AI-Based Internship Recommendation Engine

For the PM Internship Scheme | Team submission, SIH (college/internal round)

Smart India Hackathon (SIH)

[Live Demo](#)

- Contributed to the frontend of an AI-driven web platform designed to recommend relevant internships to students under the PM Internship Scheme, delivering a working build within the hackathon's tight timeframe.
- Built responsive, user-facing interface components and integrated them with the application's recommendation logic and data flow.
- Collaborated within a multi-member team under hackathon time constraints, coordinating frontend work with teammates handling backend/AI logic.

AI Chatbot

HTML, CSS, JavaScript

[Live Demo](#) | [GitHub Repo](#)

- Built a conversational chatbot interface that integrates with a third-party chatbot API to generate real-time responses.
- Handled asynchronous request/response cycles between frontend and API, including loading states and error handling.
- Designed a chat-style UI with message threading, distinguishing user input from AI-generated responses.

Weather App

HTML, CSS, JavaScript

[Live Demo](#) | [GitHub Repo](#)

- Built a weather lookup application fetching and rendering live data for any searched city via a public API.
- Handled asynchronous API calls and dynamic DOM updates to display real-time conditions without page reloads.
- Designed a clean, responsive interface focused on quick readability of weather data.

Snake Game

HTML, CSS, JavaScript

[Live Demo](#) | [GitHub Repo](#)

- Built a fully playable Snake game from scratch, implementing real-time game loop logic, collision detection, and dynamic score tracking.
- Used localStorage to persist high scores across sessions and added a live game timer for session tracking.
- Handled keyboard event listeners for responsive, low-latency player controls.

SKILLS

- Languages & Core: C++ (OOP), JavaScript (ES6+), HTML5, CSS3, Data Structures & Algorithms
- Frontend: Tailwind CSS, Responsive Design, DOM Manipulation, Flexbox, Grid
- Frameworks (Learning): React.js | Currently Learning: Backend Development
- Tools: Git, GitHub, VS Code, Netlify (Deployment)

LEADERSHIP & EXTRACURRICULAR

Head — Corporate, PR & Membership

IEEE Student Branch, DTU

Present

- Lead corporate partnerships and external communications for the student branch, coordinating with sponsors and industry contacts.
- Drive member engagement initiatives, growing active participation within the chapter.
- Contribute to technical projects and collaborative development initiatives with the Computer Society chapter.
